PROFILE

My name is Tata, a computer engineering student specializing in backend development, while expanding my frontend, cloud computing, machine learning, artificial intelligence, and DevOps skills with a passion for learning. I take pride in being a responsible and fast learner, always eager to tackle new challenges and grow.

EDUCATION

Triam Udom Suksa School

Chulalongkorn University

Computer Engineering And Digital Technology (CEDT)

EXPERIENCES

June 2024 - July 2024: Intern Cyber Security Consulting (ACIS)

- Researched and analyzed vulnerabilities to identify potential cyber threats.
- Developed recommendations and mitigation strategies to prevent cyber attacks.
- Focused on security assessments and best practices for AI-driven applications.

June 2025 - August 2025: Intern Full-Stack Developer (Indragate Mission)

- Developed a web application integrating geospatial data and AI-based analytics to support workflows.
- Implemented both front-end and back-end features to improve usability and performance.

August 2025 - Present: Part Time Developer (Indragate Mission)

- Designed, implemented, and tested software features based on client specifications.
- Collaborated with teams to deliver stable and maintainable solutions.

PROJECTS AND EXTRA ACTIVITIES

ESG Platform

- A platform to help companies manage and report their Environmental, Social, and Governance (ESG) data effectively using AI to analyze the gaps in their reporting.

A2K

- A machine learning API for advanced keyword extraction using ML techniques with paper data.

Automatic Planting

- Embedded IoT system for sensor data acquisition and data transfer to a web dashboard, alongside a LINE Messaging API webhook for automated event-based messaging.

FEcamp

- As a vice president and former head of the activity team in an academic camp, I have planned and organized team workflows to maximize efficiency, collaboration, and overall effectiveness.
